# WHY USE Restore Creams?

Restore creams are specifically formulated to **improve skin strength** and prevent it from becoming dry or damaged:

## How to apply Protect and Restore Creams

Apply one shot from the dispenser, or if using a tube - squeeze a dime sized shot on to the hand. Rub all over hands for 20-30 seconds.

Apply to the back of your hand

Rub hands back to back

Rub palms to the back of your hands

Rub between fingers

Work around fingernails

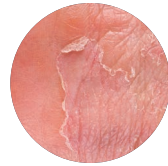

Rub around thumbs & index fingers

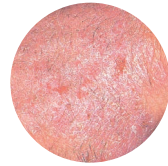

5

# DON'T FORGET to Check Your Skin

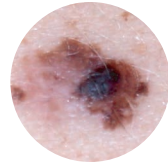

## Symptoms of potential skin disease include:

- Redness
- Itching, flaking and/or scaling skin
- Sore, cracked and/or bleeding skin

- Swelling of hands or fingers
- Blisters or welts on hands/fingers

- Check for the signs of moles changing shape (irregular outline), color, increases in size, becomes itchy, painful, starts to bleed or becomes crusty and/or looks inflamed

**Check any symptoms with your work's nurse or doctor, or see your primary care doctor**

# WHY FOCUS On Your Skin?

## What are the risks?

Every day you are potentially exposed to contaminants and conditions that can be harmful to your skin, for example:

Water based detergents, liquids and chemicals

Sweating from wearing PPE such as gloves.

UVC rays from arc welding

UVA and UVB sun rays

Mechanical oils, greases, solvents and cutting fluids

Resins, adhesives, paints and sealants

Dust, powders and airborne substances

Abrasion from tools, components and materials you handle

2

# SKIN CARE At Work

## Use the 3-step Skin Care System:

### PROTECT

Apply protection cream prior to each work period or after washing hands; reapply at least every 3 hours

### CLEANSE

Wash hands regularly to avoid prolonged contact with contaminants and prevent them from becoming ingrained in the skin

### RESTORE

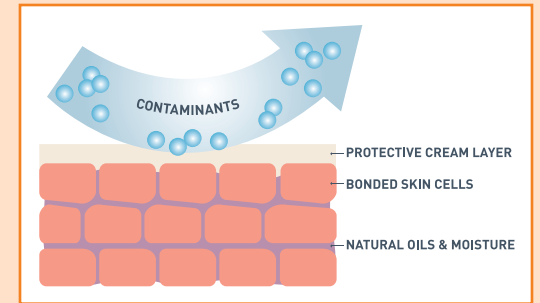

Apply restore cream after working, either at the end of your shift or prior to a long break

3

# WHY USE Protect Creams?

Protective creams are specially formulated to **provide a protective layer** on the skin surface

They provide the following benefits:

- Reduce direct skin contact with specific types of contaminants
- Make skin quicker and easier to clean with less scrubbing
- Help retain natural oils and moisture in the skin while working
- Improve comfort and skin strength when wearing PPE
- Protect skin against exposure against UV rays
