Stokolan® Classic
Enriched Skin Conditioning Cream

PRODUCT DESCRIPTION
A highly effective skin conditioning cream enriched with high levels of moisturisers. Helps to soothe dry and stressed skin by supporting the regeneration of the skin’s own natural barrier function.

WHERE TO USE
For use in industrial and healthcare environments, especially where employees are prone to dry or stressed skin.

INSTRUCTIONS FOR USE
• Apply 1ml to clean and dry skin prior to extended breaks and at the end of the working day
• Rub on all areas of the hands, including between the fingers and around the fingernails
• Can also be used on the face

After-work skin restore creams help to maintain the skin in healthy condition by keeping it strong and supple, avoiding dryness. Using restore creams is an important element in skin care best practice.

**STATUTORY REGULATIONS**
This product is manufactured and labeled in compliance with the Federal, Drug, and Cosmetic Act issued by the Food and Drug Administration (FDA).

**SAFETY DATA SHEETS**
For Safety, Environmental, Handling, First Aid and Disposal information, please refer to the Safety Data Sheet which can be downloaded from www.debgroup.com/us/sds

**SHELF LIFE**
This product has a shelf life of at least 30 months from the date of manufacture when stored unopened at room temperature.

**CERTIFICATIONS**
**ECARF Seal of Quality**
This product meets the European Centre for Allergy Research Foundation (ECARF) criteria for skin tolerability. Cosmetics can receive the seal of quality for meeting the following criteria:
1. Quantitative risk assessment of the product ingredients with respect to their potential for sensitization, taking into account their specified conditions of use & amount.
2. Medically supervised clinical trials by volunteers with atop dermatitis.
3. Approved system of quality control management.

**QUALITY ASSURANCE**
SC Johnson Professional products are manufactured in facilities which follow cosmetic Good Manufacturing Practice (cGMP) requirements.

All raw materials used for production undergo a thorough quality control process before being used for manufacturing in SC Johnson Professional’s high quality products.

All finished goods are subject to intensive quality testing before being shipped out to our customers

**PRODUCT SAFETY ASSURANCE**
**Skin Compatibility Test**
Clinical dermatological tests have been conducted to assess the skin compatibility of the product using voluntary test persons in enclosed and repeat application models. These tests, as well as in practical use, have proven that the product has very good skin compatibility. Skin compatibility expert reports are available upon request.

**Toxicological Approval**
The product has been independently assessed for human toxicity and product stability. It is declared safe for intended use, meeting all relevant regulatory requirements.

**EFFICACY TESTS**
**Skin Hydration Test**
The moisturising properties of Stokolan® Classic were assessed via application of the product twice daily at an interval of approx. 5 hours to the forearm skin of healthy volunteers over a 4 day test period. The starting values for the skin moisture were determined in the morning by means of the Corneometer® and before the first application and then again on the morning of the subsequent day.

Results show that under repeated usage conditions, Stokolan® Classic provides a continuous increase in the hydration of the skin by 31.7% over untreated skin. This demonstrates that the skin moisture is clearly improved by Stokolan® Classic when used regularly.

**Efficacy Tests**

**Skin Repairing Test**
Skin regeneration testing was performed on the forearm skin of healthy volunteers. Skin damage was induced by occlusive application of 0.5% sodium lauryl sulphate solution over a 12 hour period. The initial damage of the skin was classified by means of two parameters: a) visual inspection (irritation score according to Frosch and Kligman) and b) trans-epidermal water loss (TEWL as an indicator of the skin barrier quality). Stokolan® Classic was then applied twice daily at an interval of approx. 5-6 hours over a 4 day test period.

Results show that under repeated usage conditions, both the visually apparent damage and the barrier damage characterised by the TEWL is reduced compared to untreated skin. This demonstrates that the skin condition and barrier function is repaired by Stokolan® Classic when used regularly.

**Compatibility Tests**
In testing conducted by the Deutsches Institut für Kautschuktechnologie (DIK) in accordance with EN ISO/IEC 17025, the use of Stokolan® Classic in rubber production process does not influence the cohesive strength of rubber.
